Subject: RE: Juneau County Groundwater Investigation Website

University of Nebraska laboratory data includes the private well data, but is referenced by (S01-S05), no PII included.

This is just the geoprobe data, right, and not the private well sampling? I can't tell.

This is all just data, right? As long as there is no PII in the docs (I didn't see any in the couple I looked at), then we can release them if we want to.

Chuck: here's the data we have responsive to the Juneau County FOIA. Basically all field data related to the borings. Please review the data files and let Cheryl and Ryan know if it looks ok (I may be out a lot over the next two weeks). The FOIA deadline is Monday, I believe, so we have a tight deadline. Ryan mentioned a possible extension request because we want to get this same data to the state before releasing. We had planned to share the data with WDNR via a new EPA Juneau County website but we are not sure when the site will be ready.

Thanks,
Dean
